

Sympathetic and Parasympathetic Activity Monitoring

Heart Rate Variability (HRV) reflects the balance between sympathetic and parasympathetic activity. Slower HRV rhythms (LF) indicate increased sympathetic and/or lower vagal activity, wakefulness characteristics, while faster HRV rhythms (HF) indicate lower sympathetic and/or increased parasympathetic and vagal activity, sleepy characteristics.

com.oluha

Accurate Heart Rate Measurement

True Heart Rate Variability calculations require accurate measurement of the time between each heartbeat. For accuracy and multi-use purposes, we recommend the Polar H7 or similar Heart Rate Strap.

com.oluha

24 hours heart rate monitoring

Continuously monitors the user's heart rate to detect any abnormal patterns that may indicate stress or fatigue.

com.kd.smartwatch

Research on HR Monitors

We are continuously researching the application of wrist HR monitors, pulse oximetry, ear clip, and other options. When we are satisfied with the accuracy and quality of these devices, we will let you know.

Disclaimer on Drowsiness Detection

Although we improve our auto Drowsy algorithm on a daily basis, please understand that given the limitations of the internal sensors of your Wearable Device, we might not be able to detect certain Drivers' Drowsiness.

com.oluha

Support healthy exercise detection

The app supports the detection of healthy exercise activities, which can be correlated with heart rate data to provide insights into the user's fitness levels.

com.kd.smartwatch

Accurate Heart Rate Measurement

True Heart Rate Variability calculations require accurate measurement of the time between each heartbeat. For accuracy and multi-use purposes, we recommend the Polar H7 or similar Heart Rate Strap.

com.oluha

HRV Monitoring

Uses Heart Rate Variability (HRV) to monitor the balance between sympathetic and parasympathetic activity, indicating wakefulness or sleepiness characteristics.

com.oluha

Phone message alert

The app provides phone message alerts, which can notify the user of important messages while they are monitoring their heart rate.

com.kd.smartwatch

Alert Sound & Vibration

Smartwatch and phone will make an alert sound and vibration to wake the driver when drowsiness is detected.

com.oluha

Driver's Data Monitoring

Monitors and records driver's data such as 'Numbers of drowsy per day', 'The amount of minutes spent driving per day', 'The amount of minutes spent driving per night', and 'Total amount of minutes spent driving per day'.

com.oluha

Accident Detection and Notification

Automatically detects car accidents and sends the user's medical information and notification with the location of the car crash to the hospital.

com.oluha

Alert Sound & Vibration

Smartwatch and phone will make an alert sound and vibration to wake the driver when drowsiness is detected. You can turn off the alert by shaking your wrist.

com.oluha

Safe Driving Performance Scorecard

Viewing a driver's safe driving performance scorecard and other analytics.

com.omnitracs.sdprotect.companion

Device Diagnostics

Accessing device diagnostics to troubleshoot issues in real time.

com.omnitracs.sdprotect.companion

Alert Sound

Smartwatch and phone will make an alert sound to wake the driver when drowsiness is detected.

com.oluha

Vibration

Smartwatch and phone will make a vibration to wake the driver when drowsiness is detected.

com.oluha

Turn Off Alert

You can turn off the alert by shaking your wrist.

com.oluha

Driver's Data Monitoring

Monitors and records driver's data such as the number of drowsy incidents per day, minutes spent driving per day and night, and total minutes spent driving per day.

com.oluha

Disclaimer on Drowsiness Detection

Provides a disclaimer about the limitations of the internal sensors of wearable devices in detecting driver drowsiness, while emphasizing the usefulness of the DriveAlert feature in emergencies.

com.oluha

Single Click Check

Allows the driver to check nearby cafes and rest areas with a single click.

com.oluha

Route Display

Shows the route to the selected nearby cafe or rest area.

com.oluha

Check your vehicle health and battery data

Provides information on the vehicle's health, which can help determine if a stop at a nearby rest area is necessary.

uk.co.lightfoot.app

Track your score and other driving performance data

Allows drivers to monitor their driving performance, which can be useful for identifying when a break might be needed.

uk.co.lightfoot.app

Monitor personal/business mileage

Tracks mileage, which can be useful for planning breaks based on distance traveled.

uk.co.lightfoot.app

HRV Monitoring

Uses Heart Rate Variability (HRV) to monitor the balance between sympathetic and parasympathetic activity, indicating wakefulness or sleepiness characteristics.

com.oluha

24 hours heart rate monitoring

Continuously monitors the driver's heart rate to detect any abnormal patterns that may indicate stress or fatigue.

com.kd.smartwatch

SWM Monitoring

Generates Steering Wheel Movement (SWM) signals using accelerometers and gyroscopes on the smartwatch to detect drowsiness through steering-wheel movements.

com.oluha

Alert Sound & Vibration

Smartwatch and phone will make an alert sound and vibration to wake the driver when drowsiness is detected.

com.oluha

Nearby Cafe & Rest Area Button

Provides a button to check nearby cafes and rest areas with a single click, and shows the route to them.

com.oluha

Driver Guardian

Integrates with wearable devices to monitor the driver's vital signs, fatigue, and stress levels, providing recommendations for breaks or even assuming control of the vehicle if abnormal health patterns are detected.
